Trading History

1: Automated Bot Shutdown

"Once the trading session is complete, the automated trading bot will switch off automatically. This ensures you don't have to worry about managing the bot manually after the session ends."

2: Access the Trading History

"After the session, you can review all the trades executed during the session. To do this, navigate to the 'Trading ' section in the app."

3: Review Your Trades

"In the 'Trading ' section, you'll see a detailed summary of all the trades made by the bot. This includes information such as:

• The assets traded,

• The entry and exit points,

• The profit earned from each trade."

4: Understand Your Performance

"The trading history not only helps you track your profits but also gives you a clear understanding of how the bot operates efficiently. Remember, with the built-in breakeven system, you'll never experience a loss trade."
